- ▶ Serial Express Lite
- ▶ Incredible Surround sound
- ▶ Screen sizes: 32", 42" and 58" 21:9
- ▶ DVB-T2/T/C MPEG 2/4

Energy Label

Our Signature range gives visitors to your hotel something truly memorable and unique. For example, there is our 58" Cinema 21:9 TV, with the capability to show content in 3D! In addition the 21:9 has the same screen format as in a movie theatre, so your guests watch movies on the way they were originally intended. This, together with the full HD quality and a 400Hz Perfect Motion Rate (PMR) for superb motion sharpness that has to be seen to be believed.

Then there is the Ambilight, which takes viewing way beyond the confines of the TV. The picture is completely surrounded by a soft halo of light, which perfectly matches the colors and light

levels on screen. This makes it more entertaining and immersive while being easier on the eye at the same time.
